

PHARMACEUTICAL PAPs & MAPs

Disclaimer:

The Impact Community Center of Riverside County (ICCRC) has developed this pharmaceutical medication assistance resource guide for documented disabled individuals and older adults. While every effort has been made to ensure the information in the resource guide is accurate, websites, telephone numbers, and programs are subject to change or discontinue services without notice. We do not guarantee services for any information in this guide. Each pharmaceutical company has its own unique and individualized qualifying process for potential recipients. Individuals seeking PAP/MAP assistance should research and determine if the resources, or services, fit their needs.

ICCRC does not endorse or recommend any pharmaceutical company or PAP/MAP; this is merely a listing of available resources. We want to reassure you that this guide was created to assist you in meeting the needs of the individuals and families we serve, and we hope it serves this purpose effectively.

If you're looking to enroll in a pharmaceutical Patient /Medication Assistance Program (PAP/MAP), here's a general guide and some essential steps to follow:

1. Find the right support program for your medication – this will require you to know the name of your medication and the pharmaceutical manufacturer
2. Identify potential patient assistance programs (PAP/MAP) - See below
3. Confirm that your medication qualifies for PAP/MAP
4. Read instructions and PAP/MAP eligibility requirements carefully
5. Determine your eligibility
6. Gather required documents
7. Complete, sign and date application – If required, have your healthcare provider complete their portion of the application
8. Submit application
9. Track application status
10. Reapply as needed

Tips for Smooth Enrollment:

- **Be Organized:** Have all necessary documents readily available before starting the application.
- **Be Patient:** Enrollment processes can take time, so be patient and follow up if needed.
- **Seek Help if Needed:** If you encounter any difficulties, reach out to the program's customer support or your healthcare provider for assistance
